

CFP 380

Advanced Fibre Channel Administration and Theory

Brocade
Authorized
Training Provider

This is an advanced course on Brocade Fibre Channel products (switches, directors and HBAs). It provides hands-on experience and discussion to help students become proficient with the advanced features in Fabric OS v6.3. Content includes Fibre Channel Routing (FCR), Fibre Channel over Internet Protocol (FCIP), Adaptive Networking, Access Gateway, fabric security policies and Brocade management tools. Students perform switch management using Telnet, Brocade Web Tools and Data Center Fabric Manager (DCFM).

Target Group

This course is designed for storage administrators, SAN administrators, system administrators, SAN architects, systems engineers, and SAN operators that are involved with configuration, change management, maintenance, monitoring, configuration, tuning and optimization, and SAN troubleshooting.

Knowledge Prerequisites

- Six months experience with storage and storage area networks
- Knowledge of Fibre Channel fundamentals
- Brocade Introduction to Administration and Theory or equivalent knowledge

Course Objectives

Upon successful completion of this course, students should be able to:

- Implement Brocade Fibre Channel Routing (FCR).
- Discuss Brocade Fibre Channel over Internet Protocol (FCIP).
- Configure Brocade Adaptive Networking.
- Describe Access Gateway functionality.
- Implement Fabric OS security policies.
- Differentiate and use Brocade management tools.
- Identify Brocade hardware platforms.
- Describe Fabric OS long distance options.
