## Cisco 360 CCIE R&S Advanced Workshop 2

Cisco Internetworking Expert Routing and Switching Workshop 2 is a five day ILT class designed to be attended during the final stage of a learner's CCIE preparation effort. This course is approximately 80% hands-on and 20% lecture. During this course, each student will perform five graded assessment labs - one on each day of class. After each assessment lab, there will be an exam review with the instructor. By taking a series of graded assessment labs, each student will be able to establish a trend of performance with CCIE level labs. By working with the instructor, the student can clearly identify both the strong and weak points in performing CCIE level labs. By identifying the weak points, the student can work with the instructor in closing gaps with the weak points.
