

CUWN

Cisco Unified Wireless Networking

This course enables a network administrator to deploy a WLAN enterprise solution through the identification and successful implementation of site-appropriate hardware and software features in a Cisco Unified Wireless Network.

Course Contents

- Cisco Wireless LAN Solutions
- CUWN Installation and Configuration
- CUWN Administration
- CUWN Security
- CUWN Maintenance and Troubleshooting

Knowledge Prerequisites

The knowledge and skills that a learner must have before attending this course are as follows:

- CCNA or equivalent work experience
- Familiarity with Windows and Windows Networking
- Prior attendance of CWLF - Cisco Wireless LAN Fundamentals or IUWNE - Implementing Cisco Unified Wireless Networking Essentials v1.0 (recommended)

Course Objectives

Upon completing this course, the learner will be able to meet these overall objectives:

- Identify how the CUWN solution meets the challenges of successful WLAN deployments
- Select and properly install the Cisco Unified Wireless Network hardware appropriate to site and use requirements
- Administer CUWN, 802.11 security policies, and QoS appropriately to protect and optimize performance on the wireless network
- Configure and implement the key CUWN security features to mitigate WLAN security threats
- Utilize a recommended troubleshooting methodology and the various tools available to gather and assess system data to isolate equipment failures and security threats

Reservation and Registration

We will be glad to make a free and non-binding course reservation for you for the duration of two weeks. On www.experteach-training.com under *Registration*, you can conveniently make course reservations, registrations, and hotel reservations. Alternatively, call us under +49 6074 4868-0.

For closed groups of participants, we can modify the course contents according to your requirements. Do not hesitate to contact us!
