

MPLS

Implementing Cisco MPLS 2.3

This course prepares students for the test 642-611 (MPLS) or 642-691 (BGP + MPLS), which is part of the CCIP certification.

Course Contents

- MPLS Concepts, Protocols and Technology
- Label Allocation and Distribution
- Implementation in Cisco IOS on Frame Switching Hardware
- VPN Concepts with MPLS
- Configuring MPLS VPNs
- VPN Topologies and Design
- Internet Access from a VPN
- VPNs in large Network Structure and Migration Strategies
- MPLS Traffic Engineering

Detailed Table of Content

Knowledge Prerequisites

Cisco Certified Network Associate (CCNA) certification or equivalent level of working knowledge and experience, completion of CCNA Basics and ICND courseware is recommended training for CCNA. Equivalent knowledge and skill that can be acquired by attending Cisco's training courses ROUTE - Implementing Cisco IP Routing and BGP - Configuring BGP on Cisco Routers. Practical experience with deploying and operating networks based on Cisco network devices and Cisco IOS is strongly recommended. The course QOS is highly recommended because QoS knowledge is assumed in several sections of the course.

Reservation and Registration

We will be glad to make a free and non-binding course reservation for you for the duration of two weeks. On www.expertech-training.com under *Registration*, you can conveniently make course reservations, registrations, and hotel reservations. Alternatively, call us under +49 6074 4868-0.
