## Securing Networks with ASA Foundation

This is a five-day, leader-led, lab-intensive course. The course takes a task-oriented approach to teaching the skills to configure, operate, and manage Cisco Adaptive Security Appliance product family. It prepares learners for the Exam 642-524.

### Course Contents

- Cisco Security Appliances
- Getting Started
- Controlling Network Access
- Service Policy Rules
- Virtual Private Networks

### Knowledge Prerequisites

Students who attend this advanced course must have experience in configuring Cisco IOS software and have met the following prerequisites:

- Certification as a CCNA or the equivalent knowledge.
- Basic knowledge of the Windows operating system.
- Familiarity with the networking and security terms and concepts (the concepts are learned in prerequisite training or by reading industry publications).

### Course Objectives

- Configuring the ASA 5505 dual-ISP support
- Configuring ASA 5505 VLANs
- Configuring policy NAT
- Installing and configuring the Cisco Secure Desktop
- Configuring the security appliance to pass multicast traffic
- Configuring Layer 7 class maps and policy maps
- Initializing the AIP-SSM and CSC-SSM.

### Reservation and Registration

We will be glad to make a free and non-binding course reservation for you for the duration of two weeks. On [www.experteach.de](http://www.experteach.de) under *Registration*, you can conveniently make course reservations, registrations, and hotel reservations. Alternatively, call us under +49 6074 4868-0.

For closed groups of participants, we can modify the course contents according to your requirements. Do not hesitate to contact us!

5 days €2,590 exclusive of V.A.T.
