

Synchronous Digital Hierarchy Networks, Alarms, Protection

SDH has belonged to the main transmission technologies for many years now. It is characterized by excellent network protection and high-performance network management. The course topics comprise planning, operation, coupling, and protection of SDH networks, as well as Ethernet and IP over SDH. Next Generation SDH opens up completely new dimensions for network operators and their customers. Participants will acquire a profound and practice-related knowledge which is imperative for the management of SDH networks and permits a deeper understanding of optical transport networks.

Course Contents

- Setup of the Transport Modules
- Tasks of the Overhead and of the Pointers
- Setup and Application of the Network Elements
- Internetworking
- Clock Generation in SDH Networks
- Network Protection Concepts
- Network Management
- Measuring Technologies
- Implementation of Leased Line Connections
- SDH in Interaction with ATM, IP, and DWDM
- Packet over SONET/SDH (POS)
- SDH Next Generation: Virtual Concatenation and Link Capacity Adjustment Scheme

In this course of the ExperTeach Networking series, each student will receive the comprehensive ExperTeach course documentation.

Target Group

The course is customized for employees of network operators, vendors, ISPs, and large-scale customers. Moreover, it is designed for employees of companies which use site interconnections or long-distance traffic connections with high bit rates.

Knowledge Prerequisites

The course requires no special know-how. Interest in the topic and the active participation in the discussion ensure an optimum learning success.

Reservation and Registration

We will be glad to make a free and non-binding course reservation for you for the duration of two weeks. On www.experteach-training.com under *Registration*, you can conveniently make course reservations, registrations, and hotel reservations. Alternatively, call us under +49 6074 4868-0.

For closed groups of participants, we can modify the course contents according to your requirements. Do not hesitate to contact us!

3 days €1,545 exclusive of V.A.T.
